

Senior Pipeline Engineer

Upside Engineering Ltd. currently has an opportunity for a Senior Pipeline Engineer to join our established team of professionals in Calgary. Upside has challenging, ongoing career opportunities for experienced Engineers.

The ideal candidate will have a broad spectrum of experience including designing, constructing and operating pipelines. The candidate must have sound work ethics, be a self-starter, an excellent communicator and be a team player. Other requirements for the position are summarized below:

Skills and experience:

- 10 or more years of relevant pipeline engineering experience;
- Excellent working knowledge of CSA Z662;
- P.Eng. with APEGGA;
- Adept at writing technical reports and scopes of work and preparing cost estimates;
- Recent experience in taking a senior role within an EPC environment for pipeline projects;
- Proficient with MS Office software and various engineering software programs; and
- Working knowledge of stress analysis and materials engineering for the design of pipelines would be an asset.

Responsibilities:

- Provide appropriate engineering input and a technical overview to design activities undertaken by design/drafting staff residing within or outside the project team;
- Provide cost estimates in small to large sized projects in collaboration with all other disciplines;
- Ensure that the deliverables provided to the project are: technically accurate; within specifications, scope, budget and schedule; suitable for the intended purpose and in compliance with quality procedures and project plans
- Interface with other departments, project managers, engineers, clients and vendors during all phases of projects to ensure a good working interface and accurate exchange of technical data;
- Collaborate with project team to determine and achieve project objectives; and
- Participate in regular project meetings.

Ideally you are solutions driven and manage yourself and others well. You must also have a proven ability to generate and foster client relationships while working in a fast paced and competitive business environment. Demonstrated ability to create and direct effective teams and to mentor and develop team members is essential.

This is a chance to work with industry leaders in a uniquely enjoyable work environment. Our recruiting mission is to hire the best people for the job, provide an unbeatable work setting and respect and value our team. It's what makes us exceptional.
